RESEARCH EXPERIENCE

2023 – 2024 **National Science Foundation Graduate Research Assistant**

2021 – 2022 *Oregon State University, College of Earth, Ocean, and Atmospheric Sciences*

Evaluating the use of size-structured and size-aggregated statistical species distribution models for projecting distributions of California Current System fish and invertebrate species under different climate scenarios using the NEP ROMS.

2022 – 2023 **Cooperative Institute for Marine Ecosystem and Resources Studies Graduate Research Assistant**

Oregon State University, College of Earth, Ocean, and Atmospheric Sciences

Developed updated species distribution models for Alaskan snow crab (*Chionoecetes opilio*) in order to provide short term forecasts. Used machine learning methods to predict distributions of different sexes and sizes.

2020 - 2021 **North Pacific Research Board Graduate Research Assistant**

Oregon State University, College of Earth, Ocean, and Atmospheric Sciences

Hindcasted and forecasted eastern Bering Sea groundfish spawning distributions under future oceanographic conditions using the Bering 10K ROMS-NPZ. Used statistical modeling to hindcast distributions that then informed models used to forecast distributions during different emissions scenarios.

2018 – 2020 **Oregon Sea Grant Graduate Research Assistant**

Oregon State University, College of Earth, Ocean, and Atmospheric Sciences

Used statistical models to investigate the effects of oceanography and climate on groundfish long-term distribution and abundance in the northern California Current. Studied the overlap of fishery-independent (NOAA survey) and -dependent (logbook and landings) data sources on the Oregon continental shelf and their potential utility for assessment of nearshore flatfishes.

- 2014 – 2015 **Undergraduate Research Assistant**
Marine Science Institute, University of California Santa Barbara (Page/Dugan Lab)
 Tested the swimming duration of *Watersipora subtorquata* to determine potential to spread as invasive species. Conducted SCUBA settlement plate surveys for presence of recently settled *W. subtorquata* and eelgrass presence.
- 2014 **Undergraduate Research Assistant**
Earth Research Institute, University of California Santa Barbara (CEIN)
 Development of settlement plate frames and antifouling paint treatments to test effectiveness of zinc and copper on invertebrate fouling communities.
- 2013 – 2014 **Undergraduate Research Assistant**
EEMB Dept., University of California Santa Barbara (Collins Lab)
 Documented cabezon (*Scorpaenichthys marmoratus*) embryonic development with photomicroscopy. Assisted in larval rockfish laboratory hypoxia studies.
